

## Riding the Wave of Tech Trends: Cyber Warriors at work

In today's digital economy we are being challenged to think beyond the 'what' of digital innovation – the shiny objects, applications and capabilities – to the 'so what' – how your organization will harness emerging trends, innovation, and disruption to create real business value. This vision of building tomorrow, starting today draws attention from a natural enemy that evolved over time and has found his way into the digital world as well: the thief. What's different about today's thief? What's different about our response to protect that's what rightfully ours? And why should today's thieves even bother to target organizations in the Dutch Caribbean? Answers to these questions needs lateral thinking, let's change perspective: you have to think like a thief to catch one...

The presentation will be delivered by Mario Flores and Roy Jansen from Deloitte Dutch Caribbean.

### **Mario Flores**

*Partner Risk Advisory*

Mario Flores is the Partner responsible for the Enterprise Risk Services and Technology Consulting department of Deloitte Dutch Caribbean. Mario brings over 17 years of practical experience in managing and delivering a diverse range of project risk and assurance services.

Mario has been responsible for numerous security, privacy and controls assurance engagements in Curaçao, Aruba, Surinam and New Zealand. Over the past years he has assisted organizations to strengthen their IT security & privacy posture by means of comprehensive risk assessments, the development of IT security policies and management of a diverse range of IT security engagements which included internal security assessments, external penetration testing, web-application testing, physical security assessments and social engineering.

Mario is a Certified Information Systems Auditor (CISA), a Certified Internal Controls Auditor (CICA), and a Certified Information Security Manager (CISM) certification.

### **Roy Jansen**

*Senior Manager, Deloitte Dutch Caribbean*

Roy Jansen is a Security & Risk professional with broad knowledge and experience in the areas of IT governance, security and risk management. Prior to joining Deloitte Dutch Caribbean Roy was employed by Atos Consulting as a principal consultant Information Security & Risk Management where he was responsible for the delivery of complex international multi-stakeholder client projects. Combined with a military background (12 years in the Dutch Ministry of Defence as a naval and air force officer) with multiple roles in Risk & Audit

related entities explicitly qualifies Roy to advise organizations on a wide array of Governance, (Cyber) Risk and Assurance related topics. In addition to his subject matter expertise Roy thrives in an international work environment and has a passion for enthusiastically leading teams of risk professionals towards exceeding client expectations.

In the Netherlands Roy was a board member of the platform for Information Security (PvIB) and the Cyber Cluster of the Dutch Foundation of Defence & Security Organizations (NIDV). Roy Jansen holds a Master's degree in Economics, an Executive Master in Internal/Operational Auditing & Advisory and is expected to finalize his Executive Master in IT Auditing & Advisory in 2016.
