

## Data Security: The things IT staff never wants to talk about.

Data Security Governance has become a priority for enterprises around the world. In this talk we will cover the things your IT staff will never tell you and they don't even want to talk about. At the end of the talk the attendees will get a good understanding of the issues the IT professional encounter when trying to achieve Data Security Governance. The presenter will provide tips on where to start when you want to attain Data Security Governance.

### About the speaker

Ignacio Salom, has been working in IT for over 15 years. He has a broad experience in IT, since 2006 he has focus on Microsoft SQL Server. He has the advantage to have worked on different sectors like the health sector, Educational sector and financial sector, this variety help him to understand the differences on approach on each of these sectors. His experience helps him to view problems from different perspectives and that is what makes his contribution so valuable when addressing issues.
