Moving to digital – tailor fit solutions in real life cases

The world is changing faster than ever. To stay ahead of competition, organizations must be able to adjust rapidly to market trends, economic developments and other external factors. Reducing costs and optimizing processes is of the utmost importance to keep the business healthy.

By fulfilling ICT requirements and automate processes through Agile Development, using best of breed components built under Architecture, organizations can keep improving their business against the lowest possible investment.

SharePoint is a modern platform that enables organizations to collaborate digitally, to manage all content, and to create digital workspaces and workflows that facilitate any modern worker in his day-to-day work. By using standard building blocks within SharePoint, in combination with Agile software development, the high-speed projects deliver quality results at high speed.

2Share will demonstrate the many possibilities of SharePoint and Office 365, and show real life cases of how we enable companies like Kooyman, Court of Justice, Central Bank of Curacao and St Maarten and many others in moving to digital.

Joost Giebels – Partner in 2Share SharePoint Solution and Business Development Manager at Infotrans

After graduating his study Business Informatics in Utrecht, The Netherlands, Joost worked as Project Manager for a System integrator, 3 years later he started his own Consulting company and worked for 5 years for CAP Gemini / Sogeti as Senior Bidmanager software development.

Nowadays Joost works as Business Development Manager for Infotrans Caribbean (ICT system integrator) and is responsible for sales in 2Share SharePoint Solutions.

Fokko Scholma – Partner in 2Share SharePoint Solutions

After his graduation at the University of Groningen, The Netherlands, Fokko worked for Capgemini / Sogeti in several roles. In most of these roles, he worked with customers to analyse the business requirements and translate these into ICT solutions. Fokko has experience in Finance, Logistics, Government and Telecommunication.

Fokko is responsible for requirements management and delivery in 2Share.

2Share SharePoint Solutions is a Software Development Company that helps organizations transform their way of organizing their internal processes. 2Share facilitates digital collaboration through 21st century technology from Microsoft. 2Share focuses on design and implementations using SharePoint on premises or in the cloud (Office 365). We use standard building blocks for fast results and proven success. Based on a well-defined vision and strategy we are able to deliver business functionality fast and efficient. Our motto is: Think big, start small and scale fast! With agile development we create working components within weeks with short sprints of development work. This keeps the risk low and enables rapid transformation of business processes to new standards.
