Business Analytics – A real life story of fact-based decision making at SVB

The SVB in Curacao has implemented a SAS Business Analytics environment to get better insight into trends and developments in social security, thereby enabling fact-based decision making. SAS is one of the world's leading business analytics platforms offering advanced possibilities in e.g. visual analytics.

The business analytics lead of the SVB and of the supplier will present a case concerning health care declaration, using visual analytics for fast and in-depth data exploration, speeding up the process of verifying declarations, monitoring health care compliancy and detecting possible fraudulent behavior.

Dennis Trapenberg
BearingPoint - Solutions specialist Business Intelligence / Business Analytics

Dennis Trapenberg has a bachelor's degree in ICT & Business from Fontys Hogescholen in the Netherlands, specializing in Business Intelligence (BI). He worked for several years as a Business Intelligence consultant on various projects in the Benelux where he designed and implemented high-end BI solutions. In 2014 he joined BearingPoint where he helped establish the current Business Intelligence / Business Analytics (BI/BA) team.

For BearingPoint Dennis has developed BI/BA solutions for large customers, with a focus on tax and social security. He has a strong understanding of organizational needs and helps organizations optimize their business with Business Intelligence and Business Analytics, combing theoretical insights with a practical approach

Ivar Namias de Crasto
SVB - Solutions specialist Business Intelligence / Business Analytics

Ivar Namias de Crasto has a bachelor's degree in Information and Communication Technology from the Haagse Hogeschool in The Netherlands. He started his career at BearingPoint in 2005 as a software engineer. His principal areas of expertise included tax systems and social insurance systems. He was part of various projects in Curacao, the BES, St. Maarten and Trinidad & Tobago, where he gained a lot of experience working with different clients and systems.

In 2011 he joined the Social Insurance Bank of Curacao (SVB). During this time he began specializing in project management, internal control, IT security and especially data analytics. He developed a passion for data analytics and this became his primary area of expertise. Right now he is working on taking data analytics in SVB to the next level by using SAS.
