

## Empowerment with the Modern Workplace

During this interactive session, we'll discuss Kriotrade's options to empower its employees by increasing functionality and flexibility, while also increasing the security measures/insights to reduce business interruptions or content loss. This all by simplifying IT and having more control over IT's cost.

---

*"Identity is the new firewall of the future. We can't continue to use our old way of controlling application access, because business isn't happening exclusively in our network anymore. We need to stay in control, no matter where our users roam."*

*"We want to link all our identities and provide end-users consistency as we move to more SaaS-based applications."*

*"We want to ensure that we're keeping our operating costs as low as possible to focus our budget on more productive areas of the business."*

---

**Ronald van Ackooij**  
**Cloud Consultant – Inova Solutions**

As a firm believer in Microsoft's technologies, and the benefits businesses can have when choosing for Microsoft's portfolio. I am driving by inspiring businesses and their employees to get the most out of their investments made in Microsoft's portfolio.

I'm actively working in the IT industry since the year 2000. Coming from a position as an IT specialist at a large retail organization in The Netherlands, I've moved my love for Microsoft solutions to the Caribbean. Currently providing my services to Inova Solutions & NetPro Group, I'm daily trying to inspire business all over the Caribbean.

My focus has always been on identity, messaging, security and productivity, off course, in the "Cloud first – Mobility first" era we live in, my focus is on the Microsoft 365 platform; Office 365's productivity with Enterprise Mobility + Security, Windows 10 and Azure
